Free movement

Free rotation

Free touch

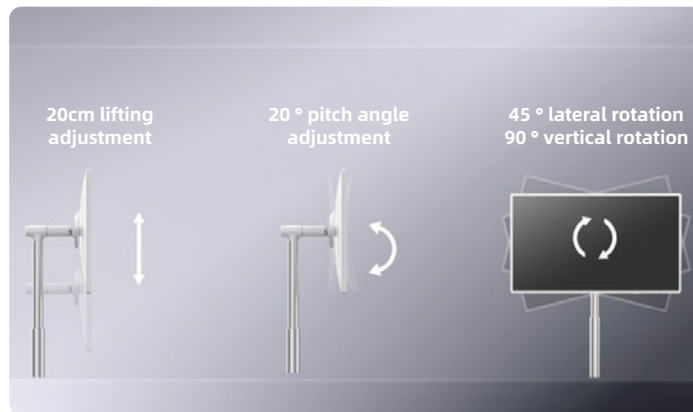

With innovative wireless design, the bottom is equipped with a movable base, which can be easily dragged at home or outdoors. In addition, a large capacity lithium battery up to 86Wh is also built in the bottom, which can be used normally for about 3 hours without external power cord.

Features

Wireless Mobility Unlimited

Mobile screen is different from traditional TV, it does not need to be fixed in the living room or computer desktop. With its own universal wheel, it can follow you everywhere, adapt to different family space needs, and meet more viewing experience.

Free adjustment to meet various viewing experiences

The adjustment of various angles, as well as the horizontal and vertical screen adaptation with gravity sensing, can bring a better viewing experience.

Smooth operator

It supports mobile phone/PAD/computer one button wireless screen projection, Type-C cable projection and reverse charging, playing games, watching movies, and online celebrity live broadcast to enjoy a large screen experience.

Application Scenario

Attend online class

The large screen is more eye protecting, more focused on learning.

Exercise and fitness, personal trainer

Multiple kinds of application software can be integrated, and with built-in audio, entertainment, fitness and other resources, you can enjoy.

A new travel companion for camping

The outdoor small cinema can meet the needs of camping entertainment in all aspects and make a wonderful trip.
